Worksheets and lesson ideas to challenge students aged 11 to 16 to think hard about atomic structure and isotopes (GCSE and Key Stage 3) This interesting clip by Ian Stewart challenges our current thinking about when students should be taught atomic theory.

### **Atomic structure teaching resources â€“ the science teacher**

A gyroscope is a wheel mounted in two or three gimbals, which are pivoted supports that allow the rotation of the wheel about a single axis. A set of three gimbals, one mounted on the other with orthogonal pivot axes, may be used to allow a wheel mounted on the innermost gimbal to have an orientation remaining independent of the orientation, in space, of its support.

Measurements were recorded simultaneously at these three heights in each of the 12 horizontal locations using three air speed probes (see Table 2 and Fig. 1). After the recording was completed in one location, the measurement equipment was moved to the next spot, but the new recording period always started a few minutes after having moved the equipment.

I have for a long time been interested in Kalman filters and how they work, I also used a Kalman filter for my Balancing robot, but I never explained how it actually was implemented. Actually I had never taken the time to sit down with a pen and a piece of paper and try to do the math by myself, so I actually did not know how it was implemented.

About this book. This book is written as a companion book to the Statistical Inference Coursera class as part of the Data Science Specialization. However, if you do not take the class, the book mostly stands on its own. A useful component of the book is a series of YouTube videos that comprise the Coursera class.
