An integrated circuit or monolithic integrated circuit (also referred to as an IC, a chip, or a microchip) is a set of electronic circuits on one small flat piece (or "chip") of semiconductor material, normally silicon. The integration of large numbers of tiny transistors into a small chip results in circuits that are orders of magnitude smaller, cheaper, and faster than those constructed of ...

Computer science is the theory, experimentation, and engineering enabling the use of algorithms to process, store, and communicate digital information. A computer scientist studies the theory of computation and the practice of designing software systems. According to Owen Astrachan, computer science is the study of "automating algorithmic processes that scale".
