Expanding the scope of the conducted emissions book therefore would have served mostly to dilute its purpose and compromise its clarity. After some informal discussions with the publisher on that subject, it was decided to correct the sin of omission by recruiting an author for a companion volume, to be titled Controlling Radiated Emissions by Design.

New to this edition is material related to technical advances, specifically super-fast data rates on wire pairs, with no increase in RF interference. Throughout the book, details are given to control RF emissions using EMC design techniques. This book retains the step-by-step approach for incorporating EMC into every new design from the ground up.
