The established authority in delivering strategic and tactical approaches necessary for quality assurance, safety, and security in the food and beverage industry.

Food Quality & Safety - Farm to Fork Safety

Food safety is a scientific discipline describing handling, preparation, and storage of food in ways that prevent food-borne illness. The occurrence of two or more cases of a similar illnesses resulting from the ingestion of a common food is known as a food-borne disease outbreak. This includes a number of routines that should be followed to avoid potential health hazards.

Food safety - Wikipedia

Food quality is the quality characteristics of food that is acceptable to consumers. This includes external factors as appearance (size, shape, colour, gloss, and consistency), texture, and flavour; factors such as federal grade standards (e.g. of eggs) and internal (chemical, physical, microbial).. Food quality in the United States is enforced by the Food Safety Act 1990.
