Political freedom (also known as political autonomy or political agency) is a central concept in history and political thought and one of the most important features of democratic societies. Political freedom was described as freedom from oppression or coercion, the absence of disabling conditions for an individual and the fulfillment of enabling conditions, or the absence of life conditions ...

THE HISTORY OF THE IDEA OF RACE AND WHY IT MATTERS

The kidneys are two bean-shaped organs. Each kidney is about the size of a fist. Your kidneys filter extra water and wastes out of your blood and make urine. Kidney disease means your kidneys are damaged and can't filter blood the way they should. You are at greater risk for kidney disease if you ...

A Humanist Modern Version Haggadah For Passover

The 1978 smallpox outbreak in the United Kingdom resulted in the death of Janet Parker, a British medical photographer, who became the last recorded person to die from smallpox. Her illness and death, which was connected to the deaths of two other people, led to an official government inquiry and triggered radical changes in how dangerous pathogens were studied in the UK.

1978 smallpox outbreak in the United Kingdom - Wikipedia

The real issue is viral shedding. Viral vaccines are vaccines containing live viruses, even if they are weak or attenuated strains. These live viruses shed for varying amounts of time in the body fluids of a vaccinated individual—and can be transmitted to others. You can absolutely catch the virus (or bacterium) from someone who has just been vaccinated against that disease.

Herd Immunity vs. Viral Shedding: Who's Infecting Whom

Protecting the country. Reducing risks. Biosecurity New Zealand's focus is on stopping pests and diseases at the border, before they get to New Zealand, and eradicating or managing the impact of those already here. With the help of New Zealanders, we ensure our unique environments and the value of ...
