The selection was based on originality and quality, and reflects many of the current directions in integer programming and combinatorial optimization research. Starting with the Copenhagen 1995 meeting, IPCO proceedings have been published by Springer in the Lecture Notes in Computer Science Series.

The IPCO series of conferences presents recent results in theory, computation and applications of integer programming and combinatorial optimization. These conferences are sponsored by the Mathematical Programming Society, and are held in those years in which no International Symposium on Mathematical Programming takes place.

Integer and Combinatorial Optimization | Wiley Online Books

An integer programming problem is a mathematical optimization or feasibility program in which some or all of the variables are restricted to be integers. In many settings the term refers to integer linear programming (ILP), in which the objective function and the constraints (other than the integer constraints) are linear .
