Crawford Scientific www.chromacademy.com 3 Definitions LC/MS is a hyphenated technique, which combines the separating power of High Performance Liquid Chromatography (HPLC), with the detection power of mass

### **Fundamental LC-MS Introduction - UMass Amherst**

High-performance liquid chromatography (HPLC; formerly referred to as high-pressure liquid chromatography) is a technique in analytical chemistry used to separate, identify, and quantify each component in a mixture. It relies on pumps to pass a pressurized liquid solvent containing the sample mixture through a column filled with a solid adsorbent material.

This chapter focuses on high performance liquid chromatography (HPLC), which is an instrumental analytical method that gained increased acceptance mainly because it met two basic factors: (1) the need for a wide range of rapid analyses for nutrients, and (2) the need for methods that can be easily automated.
