In the design of experiments, optimal designs (or optimum designs) are a class of experimental designs that are optimal with respect to some statistical criterion. The creation of this field of statistics has been credited to Danish statistician Kirstine Smith.. In the design of experiments for estimating statistical models, optimal designs allow parameters to be estimated without bias and with ...

Ellipsometry is an optical technique for investigating the dielectric properties (complex refractive index or dielectric function) of thin films. Ellipsometry measures the change of polarization upon reflection or transmission and compares it to a model.. It can be used to characterize composition, roughness, thickness (depth), crystalline nature, doping concentration, electrical conductivity ...
