The Community Guide conducts systematic reviews of interventions in many topic areas to learn what works to promote public health. The Community Preventive Services Task Force (CPSTF) uses the results of these reviews to issue evidence-based recommendations and findings to the public health community. What is a systematic review?

Charles S. Peirce randomly assigned volunteers to a blinded, repeated-measures design to evaluate their ability to discriminate weights. Peirce's experiment inspired other researchers in psychology and education, which developed a research tradition of randomized experiments in laboratories and specialized textbooks in the 1800s.

3 This User's Guide to Implementing Patient-Reported Outcomes Assessment in Clinical Practice was developed by a team of volunteers from the International Society for Quality of Life Research (ISOQOL). The purpose of this User's Guide is to help clinicians who are interested in using patient-reported outcome (PRO) measures in their clinical practice as a tool in patient management.

User's Guide to Implementing Patient-Reported Outcomes

A randomized controlled trial (or randomized control trial; RCT) is a type of scientific (often medical) experiment which aims to reduce bias when testing a new treatment. The people participating in the trial are randomly allocated to either the group receiving the treatment under investigation or to a group receiving

standard treatment (or placebo treatment) as the control.

Randomized controlled trial - Wikipedia

CHAPTER 1 Foundations of Epidemiology OBJECTIVES After completing this chapter, you will be able to:
Define epidemiology. Define descriptive epidemiology. Define analytic epidemiology. Identify some activities performed in epidemiology. Explain the role of epidemiology in public health practice and individual decision making. Define epidemic, endemic, and pandemic.
