Tame and galois extensions with respect to hopf orders

This book studies Hopf algebras over valuation rings of local fields and their application to the theory of wildly ramified extensions of local fields. The results, not previously published in book form, show that Hopf algebras play a natural role in local Galois module theory.

Integral Hopf-Galois Structures for Tame Extensions Paul Truman Keele University, UK. Hopf-Galois Structures Nonclassical Hopf-Galois structures can provide a variety of viewpoints on a given finite separable extension of $L=K$. We will focus on Galois extensions of p -adic fields.

In this paper we consider tame Galois extensions of number fields L / K with group $G \cong C_2 \times C_2$ and

study in detail the local and global structure of the ring of integers \mathcal{O}_L as a module over its associated order \mathcal{O}_H , H in each of the Hopf algebras H giving a nonclassical Hopf-Galois structure on the extension.

Keywords: Hopf-Galois theory, Galois module structure, tame extension. **Abstract** Let p be an odd prime number, K a number field containing a primitive p -th root of unity, and L a Galois extension of K with Galois group isomorphic to $C_p \times C_p$.

Truman: Hopf-Galois module structure of tame C_p

Introduction to "Taming Wild Extensions", by Lindsay N. Childs. Galois module theory is the branch of algebraic number theory which studies rings of integers of Galois extensions of number fields as modules over the integral group ring of the Galois group.

Tame and Galois extensions with respect to Hopf orders

We construct a Hopf Galois extension S in O , whose ring $H(S)$ of G -endomorphisms is a dual Larson order. We affirm an order $S \in O$ with a dual Larson order $H(S)$ is a tame $H(S)$ -extension and show that S is maximal in such orders $S \in O$.
