

tensor categories and endomorphisms pdf

In mathematics, a linear map (also called a linear mapping, linear transformation or, in some contexts, linear function) is a mapping $V \rightarrow W$ between two modules (including vector spaces) that preserves (in the sense defined below) the operations of addition and scalar multiplication.. An important special case is when $V = W$, in which case the map is called a linear operator, or an ...

Linear map - Wikipedia

Definition. A matrix is a rectangular array of numbers or other mathematical objects for which operations such as addition and multiplication are defined. Most commonly, a matrix over a field F is a rectangular array of scalars each of which is a member of F . Most of this article focuses on real and complex matrices, that is, matrices whose elements are real numbers or complex numbers ...
