Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography.

BoilerKey. The Purdue BoilerKey is a convenient means of significantly improving the security of protected computer systems. Activating BoilerKey is an implementation of two-factor authentication, a system that requires two forms of verification of identity before a person can access protected computer resources -- something that you have and something that you know.

No matter their size, all sharks have similar anatomy. Like other elasmobranchs (a subclass of animals that also includes rays and skates), sharks have skeletons made of cartilageâ€”the hard but flexible material that makes up human noses and ears. This is a defining feature of elasmobranchs, as most fish have skeletons made of bone.
